

DECLARATION OF CONFORMITY

DECLARATION OF CONFORMITY OF THE MATERIAL PU-BA/1

Complied by:	Approved by Management:	Version:	Date:	Repl.:
O. Carstensen	B. Funke	07	11.01.2023	06

The material PU-BA/1 has been tested with regard to the overall migration according to regulation 10/2011/EG in the amended current version for the suitability for repeated contact with food under the following conditions:

- Contact with all types of food
- Any food contact conditions, hot filling and / or heating to a temperature (T) include, where $70^{\circ}\text{C} \leq T \leq 100^{\circ}\text{C}$ for a duration of at most $t = 120/2^{((T-70)/10)}$ minutes, which is not followed by long-term storage at room temperature or under cooling.

According to the results of the tests carried out, the total migration limit of 10 mg / dm² is observed. In terms of overall migration, the examined sample also complies with Regulation (EU) No. 1935/2004 in its current version.

The contact times and temperatures have been selected to represent the actual conditions of our products. The material was manufactured in accordance with the requirements of the Commission Regulation (EC) No. 2023/2006 on good manufacturing practice for materials and articles intended to come into contact with food.

Similant	Duration/ Temperature	Parameter	Limit value	Result
Ethanol 10% (A)	2 h / 70°C	onesided contact to product 	10 mg / dm ²	< 2,0 mg / dm ²
Acetic acid 3% (B)	2 h / 70°C	onesided contact to product 	10 mg / dm ²	< 2,0 mg / dm ²
Isooctan (D2)	0,5h / 40°C	onesided contact to product	10 mg / dm ²	< 2,0 mg / dm ²

The chemical composition of the PU-BA /1 material corresponds to the FDA positive list. The raw materials used are included in the approval list of FDA (Food and Drug Administration), HHS, §175.300 (2) for direct contact with food.
